IARCS, the Indian Association for Research in Computing Science, announces the 28th Foundations of Software Technology and Theoretical Computer Science conference in Bangalore, India. The FSTTCS conference is a forum for presenting original results in foundational aspects of Computer Science and Software Technology. This year, FSTTCS will be colocated with the Sixth Asian Symposium on Programming Languages and Systems (APLAS 2008).

The invited speakers are HUBERT COMON-LUNDH, URIEL FEIGE, ERICH GRÄDEL, SIMON PEYTON JONES, and LESLIE VALIANT.

Scope:

Authors are invited to submit papers presenting original and unpublished research in any area of Theoretical Computer Science or Foundational aspects of Software Technology. Representative areas include, but are not limited to: Algorithms and Complexity; Automata and Formal Languages; Logic in Computer Science; Software Specification and Verification. Check the conference homepage for a more detailed list of topics.

Submission:

Authors may submit drafts of full papers or extended abstracts. Submissions are limited to 12 pages using 11-point or larger font, with adequate spacing and 1-inch margins all around. Concurrent submission to other conferences or journals is not acceptable. The site for submissions is EasyChair. Check the conference homepage for more details.

Proceedings:

Accepted papers will be published as the proceedings of the Conference. In a new initiative towards an open system, the proceedings will take the form of a free, open, electronic archive with access to all. In addition to being permanently archived on ArXiv and other online servers, the proceedings of the Conference will be hosted on the Dagstuhl Research Online Publication Server (DROPS), with an ISBN number provided by DROPS. Authors will retain full rights over their work. The accepted papers will be licensed under the Creative Commons Attribution-Noncommercial-No Derivative Works 2.5 License: Creative Commons-NC-ND.

Important Dates:
